Above right: 2D profile of D_{α} light emission around the lower divertor during an ELM (Edge Localized mode) event (see section 3). Below right: visible image of a closed divertor plasma which was produced in the JFT-2M (see section 4). Above left: cross section of the JFT-2M (see section 2). Below left: Ferritic steel plates which completely covered the inside of the vacuum vessel wall (see section 5).
