Special Topic Article

Present and Future of Laser Accelerator	
1. History and Future Prospect	KITAGAWA Yoneyoshi 240
2. Principle of Laser-Plasma Acceleration	OGATA Atsushi 245
3. Capillary Acceleration of Electrons	KITAGAWA Yoneyoshi 250
4. Monoenergetic Electron Beam Generation in Laser-Driven Plasma Acceleration MIURA Eisuke, KOYAMA Kazuyoshi and KATO Susumu	255
5. Laser Driven Ion Acceleration	DAIDO Hiroyuki 261

Lecture Note

Superconductivity Engineering and its Application for Fusion	
Introduction	HAMAJIMA Takataro 272
1. Superconducting Coils for Fusion	TAKAHATA Kazuya 273

Contributed Papers

Pedestal Characteristics of H-Mode Plasmas in JT-60U and ASDEX Upgrade URANO Hajime, KAMADA Yutaka, TAKIZUKA Tomonori, SUTTROP Wolfgang, HORTON Lorne, LANG Peter, KUBO Hirotaka, OYAMA Naoyuki, TAKENAGA Hidenobu and ASAKURA Nobuyuki	280
High Power Electron Heating Experiments at the Plug Region of GAMMA 10 SAITO Teruo, ISHII Kameo, ITAKURA Akiyoshi, ICHIMURA Makoto, ISLAM Md. Cover

Tritium surface distributions of the TFTR plasma facing components by the imaging plate method. Red color of the image increases with increasing tritium amount. The sample is a part of the tile used as the inner limiter placed at KC-16 in D-T experiments. The plane (b) is the plasma facing surface. The plane (a) and (c) are sides of the sample tile. The tritium amount on the plasma facing surface is less than that on the both sides. (p.296 Depth Profile Measurements of Hydrogen Isotopes near the Surface of the TFTR Plasma Facing Component using Nuclear Reaction Analysis, JAERI N.Kubota *et al.*)
