

JOURNAL OF PLASMA AND FUSION RESEARCH

The Journal of the Japan Society of Plasma Science and Nuclear Fusion Research

Vol. 82, No.9, September 2006

Special Topic Article

Edge Localized Mode (ELM)

- | | | |
|---|---|-----|
| 1. Introduction | KAMADA Yutaka | 565 |
| 2. Various Types of ELMs..... | KAMADA Yutaka, OYAMA Naoyuki and SUGIHARA Masayoshi | 566 |
| 3. Spatial Structure and Dynamics of ELM Crash | OYAMA Naoyuki and MORITA Shigeru | 575 |
| 4. Recent Progress of ELM Plasma Transport Study in SOL and Divertor
..... | ASAKURA Nobuyuki and OHNO Noriyasu | 582 |
| 5. ELM from Viewpoint of MHD Analysis | MIZUGUCHI Naoki and OZEKI Takahisa | 590 |
| 6. Summary | KAMADA Yutaka | 597 |

Lecture Note

Comprehending the Structure of a Vacuum Vessel and In-Vessel Components of Fusion Machines

- | | | |
|--|--|-----|
| 1. Comprehending the Vacuum Vessel Structure | ONOZUKA Masanori and NAKAHIRA Masataka | 599 |
|--|--|-----|

Contributed Papers

Development of Minimum Mass EUV Light Source Plasma for the Next Generation Lithography

- | | | |
|-------|---|-----|
| | FUJIOKA Shinsuke, NISHIMURA Hiroaki, IZAWA Yasukazu, NISHIHARA Katsunobu,
AOTA Tatsuya, UEDA Nobuyoshi, ANDO Tsuyoshi, MURAKAMI Masakatsu, KANG Young-G,
NORIMATSU Takayoshi, NAGAI Keiji, GU Qincui, YASUDA Yuzuri, MIYANAGA Noriaki,
MIMA Kunioki, SHIMADA Yoshinori, HASHIMOTO Kazuhisa, YAMAURA Michiteru,
SUNAHARA Atsushi, FURUKAWA Hiroyuki, UCHIDA Shigeaki and NANBA Shin-ichi | 609 |
|-------|---|-----|

Simulation on Ablation for Design of Liquid Wall Chamber of Laser Fusion Reactor

- | | |
|--|-----|
| ... FURUKAWA Hiroyuki, JOHZAKI Tomoyuki, KOZAKI Yasuji, NORIMATSU Takayoshi, AZECHI Hiroshi,
NISHIKAWA Masahiro, TANAKA Kazuo-A., MIMA Kunioki, TOMABECHI Ken and YAMANAKA Chiyoe | 617 |
|--|-----|

Kinematic Analysis on Rail Deployment into Vacuum Vessel for ITER Blanket Maintenance

- | | | |
|-------|--|-----|
| | KAKUDATE Satoshi and SHIBANUMA Kiyoshi | 628 |
|-------|--|-----|

Series

Let Us Start Parallel Processing Using High Performance Fortran !

- | | | |
|-------------------------|---|-----|
| 2. Let Us Use HPF | IWASHITA Hidetoshi, HAYASHI Yasuharu and ISHIGURO Seiji | 638 |
|-------------------------|---|-----|

Auto-bicoherence of the floating potential fluctuations measured at about 2 cm inside the separatrix in ohmically heated plasmas in the JFT-2M tokamak. This is an example of measurement of nonlinear processes in the drift wave-zonal flow systems. Significant auto-bicoherence in the frequency range of $f_1 \pm f_2 = \pm 15$ kHz presents intensity of nonlinear coupling between geodesic acoustic mode and drift wave turbulence. (Y. Nagashima *et al.*, Plasma and Fusion Research Vol.1, 041 (2006) September. <http://www.jspf.or.jp/PFR/>)
