Special Topic Article
Space Weather Forecast
1. Introduction  ................................................................. WATARI Shinichi and NAGAOKA Kenichi 737
2. Impacts of Space Storms on Technologies and Space Weather Forecast ........................... WATARI Shinichi 739
3. Solar Plasma ................................................................. ASAI Ayumi 745
4. Solar Wind Plasma .......................................................... KOJIMA Masayoshi 751
5. Magnetospheric Plasma .................................................... OBARA Takahiro 756
6. Ionospheric Plasma ......................................................... MARUYAMA Takashi 762

Lecture Note
Comprehending the Structure of a Vacuum Vessel and In-Vessel Components of Fusion Machines
3. Comprehending the Blanket Structure ....................... SUZUKI Satoshi, AKIBA Masato and SAI TO Masakatsu 768

Contributed Paper
Study on Improvement of the Lifetime of a Field-Reversed Configuration by Tangential Neutral Beam Injection
.................................................. TAKAHASHI Yoshiki, KONDO Yoshimi, HIRANO Yoichi, ASAI Tomohiko, TAKAHASHI Tsutomu, MIZUGUCHI Naoki and TOMITA Yukihiro 775

Summary of Doctoral Thesis
The Study on Behaviors of Fine Particle Plasmas ................................................................. ANDO Ayumi 785
Stability of Flowing Plasmas —Non-Hermitian Generator, Singularities and Variational Principle
.................................................. HIROTA Makoto 789
Polarization Reversal of Electron Cyclotron Waves and Control of Plasma-Potential Structures
.................................................. TAKAHASHI Kazunori 792

Series
Let Us Start Parallel Processing Using High Performance Fortran 
4. Let Us Make HPF Program (2) ....................... IWASHITA Hidetoshi, HAYASHI Yasuha ru and ISHI GURO Seiji 796

PFR Abstracts ................................................................. 800

Plasma & Fusion Calendar ................................................................. 801

Information ................................................................. 802

Cover
Comparison of images reconstructed from a toroidally symmetric, poloidally asymmetric, radially hollow plasma radiation model (left column) with corresponding plasma radiation images (right column) from the world’s first two Infrared Imaging Video Bolometers with tangential (top row) and top (bottom row) views of the plasma during radiating collapse at the operational density limit in the Large Helical Device. (Byron J. PETERSON et al., Plasma and Fusion Research Vol.1, 045 (2006) October. http://www.jspforjp/pfr/)
