JOURNAL OF PLASMA AND FUSION RESEARCH

The Journal of the Japan Society of Plasma Science and Nuclear Fusion Research

Vol. 83, No.1, January 2007

Prologue
ITER Entering into a New Phase ...................................................... IKEDA Kaname

Special Topic Article
Conceptual Design of the Fast Ignition Laser Fusion Power Plant (KOYO-Fast)
5. Design of Laser Driver on Fast Ignition Reactor

MIYANAGA Noriaki, KAWANAKA Junji, KAWASHIMA Toshiyuki, TSUBAKIMOTO Koji,
FUJIMOTO Yasushi, KUBOMURA Hiroaki, MATSUOKA Shinichi, IKEGAWA Tadashi,
SUZUKI Yoshihiko, TSUCHIYA Noboru, JITSUNO Takahisa, FURUKAWA Hiroaki,
KANABE Tadashi, FUJITA Hisanori, YOSHIDA Kunio, NAKANO Hitoshi, NISHIMAE Junichi,
NAKATSUKA Masahiro, UEDA Kenichi and TOMABECHI Ken

6. Design of Chamber and Reactor Systems

KOZAKI Yasuji, NORIMATSU Takayoshi, FURUKAWA Hiroyuki, HAYASHI Takumi,
SOUMAN Yoshihito, NISHIKAWA Masahiro and TOMABECHI Ken

7. Summary and Future Task ....................................................... KOZAKI Yasuji, NORIMATSU Takayoshi and TOMABECHI Ken

Special Topic Article
Superconducting Magnet Technologies for Magnetic Confinement Nuclear Fusion Reactor

1. Introduction ................................................................................. NISHIMURA Arata and SEO Kazutaka
2. Cryogenic Structural Materials ...................................................... HAMADA Kazuya
3. Electric Insulation Materials ......................................................... NISHIJIMA Shigeiho and NISHIMURA Arata
4. Superconducting Materials and Conductors .................................. TAKEUCHI Takao, KISS Takehiro and KOIZUMI Norikiyo
5. Some Issues on Superconducting Magnet under Neutron Irradiation

NISHIMURA Arata and NISHIJIMA Shigeiho

6. Summary .................................................................................... NISHIMURA Arata and OKUNO Kiyoshi

Lecture Note
Research Guidance to Fast-Flowing Plasmas and Shock Waves

1. Physics of Plasma Shock Waves

1.1 Introduction .............................................................................. INUTAKE Masaaki
1.2 Elements of Flow and Shock in Conventional Gasdynamics .......... INUTAKE Masaaki
1.3 Plasma Characteristics in Shock Wave Physics ............................ OHSAWA Yukiharu
1.4 Collisionless Shock Waves in Magnetized Plasmas ....................... OHSAWA Yukiharu
1.5 Verification of Electrostatic Solitons and Shock Waves .................. SAEKI Koichi

Project Review
Progress in JT-60 Joint Research ..................................................... KIMURA Haruyuki, INUTAKE Masaaki, KIKUCHI Mitsuru,
OGAWA Yuichi, KAMADA Yutaka, OZEKI Takahisa, NAITO Osamu, TAKASE Yuichi,
IDE Shunsuke, NAGASAKI Kazunobu, ISAYAMA Akihiro, TANABE Tetsuo, MIYA Naoyuki,
NAKATSUKA Masahiro, HATAE Takaki, IDA Katsumi and TAKENAGA Hidenobu

Series
Let Us Start Parallel Processing Using High Performance Fortran!
6. Let Us Look into Application Programs ......................................... SAKAGAMI Hitoshi

PFR Abstracts ................................................................................. 101

Plasma & Fusion Calendar ................................................................. 102

Announcement ................................................................................. 109

List of Newly Arrived Publications, NIFS .......................................... 123

Cover
Helium EIR (electron-ion recombination) plasma in the steady-state linear divertor simulator MAP (material and plasma)-II in the University of Tokyo. Recombination "front" with an electron temperature of about 0.1 eV surround the ionizing plasma stream with about several eV. As the puffing gas from the downstream region (right) increases, the recombination front is shifted to the upstream (left). (Filippo SCOTTI et al., Plasma and Fusion Research Vol.1, 054 (2006) December. http://www.jspfor.jp/PFR/)
