

JOURNAL OF PLASMA AND FUSION RESEARCH

The Journal of the Japan Society of Plasma Science and Nuclear Fusion Research

Vol. 84, No.8, August 2008

Special Topic Article

Complexity of Plasmas and Structure Formation Dominated by Atomic and Molecular Process	
6. Theory and Simulation Models Including Atomic and Molecular Process	
6.1 Numerical Modeling of Atomic-Molecule Processes for Discharge and Lighting	
..... KATO Susumu, TAKAHASHI Eiichi, SASAKI Akira and KISHIMOTO Yasuaki	477
6.2 Simulation of Ionization Dynamics and Structure Formation of Materials	
..... KISHIMOTO Yasuaki	484
7. Toward New Cross between Atomic/Molecular Physics and Plasma Physics	
..... KISHIMOTO Yasuaki and KATO Susumu	492

Special Topic Article

Extremely High-Beta Concept: FRC and Its New Developments	
1. Introduction	ASAI Tomohiko 498
2. Fundamental Nature of FRC	
2.1 Why is a Magnetic Configuration with $\langle\beta\rangle\sim 1$ Possible?	TAKAHASHI Toshiki, INOMOTO Michiaki and ASAI Tomohiko 500
2.2 Is a Magnetic Configuration with $\langle\beta\rangle\sim 1$ Stable?	KANKI Takashi and MIZUGUCHI Naoki 503
2.3 How can a Magnetic Configuration with $\langle\beta\rangle\sim 1$ be Formed?	TAKAHASHI Tsutomu and HIRANO Yoichi 507
3. Current State of FRC Research	
3.1 Translation Experiments of FRC and Its Variety of Applications	ASAI Tomohiko and INOMOTO Michiaki 511
3.2 Sustainment of FRC by Rotating Magnetic Fields	INOMOTO Michiaki and KITANO Katsuhisa 514
3.3 Merging Formation of FRC and Its Current Ramp-up by CS Coil	ONO Yasushi 518
3.4 Steady State Operation of FRC by Neutral Beam Injection	TAKAHASHI Toshiki and HIRANO Yoichi 522
4. Spin-off of FRC Technology and Theory	
4.1 Small Scale Fusion: The Pulsed and Compressed High-Density FRC Experiment	GOTA Hiroshi, INTRATOR Thomas P. and SLOUGH John T. 525
4.2 A Plasma Magnetosphere Generated by Rotating Magnetic Fields for Plasma Sail Propulsion	SLOUGH John T. 527
4.3 Physics of Two-Fluid Plasmas	STEINHAUER Loren C. 530
5. Conclusion	INOMOTO Michiaki, ASAI Tomohiko, TAKAHASHI Toshiki and TOMITA Yukihiro 534

Lecture Note

Radiation Damage on Fusion Reactor Materials	
5. The Change in Material Properties Caused by Irradiation Damage	HASEGAWA Akira 541

Research and Technology Notes

An Automated Method to Generate the Collisional Radiative Model of Multiple Charged Ions	SASAKI Akira, NISHIHARA Katunobu and MURATA Masaki 546

Cover

Nonlinear simulation results of plasma blob radial propagation in the scrape-off layer. The density contour plots for a small and large blob are given by a modified Hasegawa-Wakatani model. The Kelvin-Helmholtz instability appears for a small blob, while the interchange instability appears for a large blob. (Satoru SUGITA *et al.*, Plasma and Fusion Research Vol.3, 040 (2008). <http://www.jspf.or.jp/PFR/>)
