

JOURNAL OF PLASMA AND FUSION RESEARCH

The Journal of the Japan Society of Plasma Science and Nuclear Fusion Research
Vol. 85, No.6, June 2009

Commentary

Still Worried about Landau Resonance?	
-Interaction between a Pulse-Wave and Charged Particles-	AKIMOTO Kazuhiro and HOJO Hitoshi
	329

Special Topic Article

Progress of ECH·ECCD in Fusion Plasmas	
1. Introduction	KUBO Shin
2. Basic Theory and the Progress in the Simulation and the Modeling of ECH·ECCD	337
..... FUKUYAMA Atsushi, MAEKAWA Takashi, HAMAMATSU Kiyotaka and MURAKAMI Sadayoshi	339
3. Progress of the ECH·ECCD Experiments	
3.1 Recent Progress of the Devices for ECH·ECCD	SAKAMOTO Keishi
3.2 Recent Progress of the ECH·ECCD Experiments in Tokamaks and Spherical Tokamaks	351
..... ISAYAMA Akihiko and TANAKA Hitoshi	357
3.3 Recent Progress of the ECH · ECCD Experiments in Helical Devices	
..... SHIMOZUMA Takashi and NAGASAKI Kazunobu	368
3.4 Recent Progress of the ECH Experiments in Mirror Devices	IMAI Tsuyoshi
	378

Lecture Note

Nonlinear Optical Crystals and their Application to Plasma Science	
2.1 Broadband Amplification in an Optical Parametric Chirped-Pulse Amplifier System	OKADA Hajime,
KIRIYAMA Hiromitsu, NAKAI Yoshiki, TANOUE Manabu, SHIMOMURA Takuya, KONDOH Shuji,	
KANAZAWA Shuhei, MORI Michiaki, DAIDO Hiroyuki, KIMURA Toyoaki and TAJIMA Toshiki	384
2.2 Production of Femtosecond UV Pulse and Efficient X-ray Generation	
by Femtosecond UV Laser-Nanocluster Interaction	MORI Michiaki
	389

Contributed Paper

Impact of Three-Dimensional Magnetic Structure on Transport Characteristics in High Density Divertor	
..... KOBAYASHI Masahiro, FENG Yuehe, MORITA Shigeru, MASUZAKI Suguru,	
CHOWDHURI Malay Bikas, EZUMI Naomichi, KOBAYASHI Tomoyuki, YAMADA Hiroshi,	
MORISAKI Tomohiro, OHYABU Nobuyoshi, GOTO Motoshi, YAMADA Ichihiro, NARIHARA Kazumichi,	
KOMORI Akio, MOTOJIMA Osamu and LHD Experiment Group	393

PFR Abstracts	403
Information	406
Plasma & Fusion Calendar	408
Announcement	410

Cover

Plasma produced in an internal coil device RT-1. The internal coil made of high temperature superconductor (a diameter and a weight of the coil are 50 cm and 110 kg, respectively) is magnetically levitated in the vacuum vessel during a few hours within a position accuracy of 100 micrometers. The plasma is produced by a microwave of electron cyclotron range of frequencies, and high beta plasma confined by dipole magnetic field is explored. (Yuichi OGAWA *et al.*, Plasma and Fusion Research Vol.4, 020 (2009) <http://www.jspf.or.jp/PFR/>)
