

# JOURNAL OF PLASMA AND FUSION RESEARCH

*The Journal of the Japan Society of Plasma Science and Nuclear Fusion Research*

*Vol. 87, No.4, April 2011*

## Commentary

Safety Handling Procedures of Beryllium Intermetallic Compound on Fusion Blanket Study .....	SHIBAYAMA Tamaki, NAKAMICHI Masaru, MIYAMOTO Mitsutaka, KUGA Noriyoshi, DORN Christopher K. and KNUDSON Theodore L.	259
---	--	-----

## Lecture Note

Introduction of Pulsed Power Technology		
5. Application of Pulsed Power Technology .....	KATSUKI Sunao, TAKAKI Koichi and NAMIHIRA Takao	268
6. Conclusion .....	KATSUKI Sunao	276

<b>PFR Abstracts</b> .....		277

## Cover

Conception of nano-bio fusion science opened and created using solid-gas-liquid interfacial plasmas. The development and utilization of advanced gas, liquid, and gas-liquid interfacial plasma processes are practiced, promoting the fusion between atom encapsulated C<sub>60</sub>, carbon nanotubes, nanoparticles, and biomolecules, and realizing the creation of their novel conjugates, which is directed toward the development of biological and medical applications. With these advances as the foundation, the construction of plasma nanobio-electronics system encompassing plasma nanobio devices, intracellular nanoengineering, and nanomedicine is challenged. (Rikizo HATAKEYAMA and Toshiro KANEKO, Plasma and Fusion Research Vol. 6, 1106011 (2011) <http://www.jspf.or.jp/PFR/>)
