Commentary

Recent Research Activities on Breakdown and Start-up towards Future Superconducting Large Tokamaks

................................................................. MAEKAWA Takashi, IDE Shunsuke, KAJIWARA Ken, NAGASAKI Kazunobu, ISAYAMA Akihiko and HADA Kazuyoshi 671

Commentary

Electron-Beam-Excited-Plasma Source ................................................................. ICHIKI Ryuta and HARA Tamio 682

Project Review

Toward New Developments of Plasma-Bio Interdisciplinary Science

1. Introduction ................................. HATAKEYAMA Rikizo and NAGATSUBI Masaaki 689
2. Biomacromolecular Soft-interface Science ....................................................... MAEDA Mitsu 691
3. Interaction of Plasmas with Biological Objects in Plasma Medicine .................. HAMAGUCHI Satoshi 696
4. The Latest Trend of Plasma Nanobioelectronics Research ·· KANEKO Toshio and HATAKEYAMA Rikizo 704
5. Biological Effects of Intense Pulsed Electric Fields and Their Advanced Medical Applications

................................................................. KATSUMI Sunao, YANO Masahiko, MITSUTAKE Kazunori, MOROTOMI-YANO Keiko, ABE Keisuke, YANO Ken-ichi and AKIYAMA Hidemori 710
6. Evolution of Plasma Science and Technology in Bio-Medical Fields ·· NAGATSUBU Masaaki and OGINO Akihisa 715
7. Conclusion .................................................. NAGATSUBU Masaaki and HATAKEYAMA Rikizo 721

Research and Technology Note

Voltage Control of Pulsed Power using FPGA

................................................................. AKIYAMA Masahiro, SAKAMOTO Tatsuro, TAKAHASHI Katsuyuki, UENO Takahisa, SAKUGAWA Takashi and AKIYAMA Hidemori 724

Cover

A spherical tokamak (ST) plasma is connected to the external poloidal coil flux in UTST merging device, enabling magnetic helicity injection through the current sheet with plasmoid from the coil flux into ST. Figures show (a) the experimental setup of UTST device with two pairs of PF coils, and 2-D contours of the poloidal magnetic fluxes with (b) toroidal current density j\text{\text{t}}, (c) toroidal eigen-values \lambda_t, and (d) poloidal eigen-values \lambda_p. (Takenori G WATANABE \text{et al.}, Plasma and Fusion Research Vol. 6, 1202131 (2011) http://www.jspor.jp/PFR/)
