

JOURNAL OF PLASMA AND FUSION RESEARCH

The Journal of the Japan Society of Plasma Science and Nuclear Fusion Research

Vol. 90, No.11, November 2014

Special Topic Articles

Progress of Fast Ignition Experiment for Laser Fusion - Achievement with Novel -

Plasma Diagnostics Compatible with Radiation Harsh Environment

1. Preface SHIRAGA Hiroyuki, AZECHI Hiroshi and MIMA Kunioki 655
2. Development of X-Ray and Neutron Diagnostics under the Harsh Noise Environment of Fast Ignition Experiments
..... NAKAI Mitsuo, ARIKAWA Yasunobu, KOGA Mayuko, ABE Yuki, NAGAI Takahiro,
MAEGAWA Osamu, FUJIOKA Shinsuke, SHIRAGA Hiroyuki and AZECHI Hiroshi 659
3. Hard X-Ray Spectroscopy and Electron Measurement in the Fast Ignition Experiment
..... ARIKAWA Yasunobu, ZHANG Zhe, IKENOUCHI Takahito, KOJIMA Sadaoki, SAKATA Shohei,
OZAKI Tetsuo, FUJIOKA Shinsuke and NISHIMURA Hiroaki 665
4. Accurate High-Density Plasma Measurements Using Ultrashort-Pulse, Laser-Produced
Monochromatic X Rays SAWADA Hiroshi, FUJIOKA Shinsuke and HOSODA Tatsuya 672
5. Progress of Fast-Ignition Laser Fusion Experiment FUJIOKA Shinsuke and FIREX Project Team 679

Special Topic Articles

Space Plasma Physics throughout the Solar System

1. Introduction FUJIMOTO Masaki 685
2. The Solar Wind and the Heliosphere OKA Mitsuo 687
3. The Earth's Magnetosphere
3.1 Collisionless Shocks around the Earth's Magnetosphere SHINOHARA Iku 691
3.2 Magnetic Reconnection in the Earth's Magnetosphere NAGAI Tsugunobu 697
3.3 Mechanisms of Plasma Transportation in the Earth's Magnetosphere SEKI Kanako 704
3.4 Auroral Physics in the Earth's Magnetosphere SHIOKAWA Kazuo 708
3.5 Dynamics of Geospace during Space Storms MIYOSHI Yoshizumi 713

Lecture Note

Debut on Magnetic Plasma Experiment

4. Let's Measure Various Plasma Parameters!
4.1 Basis of Plasma Measurement YAMAMOTO Satoshi 719
4.2 Transmit Signals Correctly EZUMI Naomichi 727
Column 5 KITAJIMA Sumio 730
Column 6 KITAJIMA Sumio 731
5. Safety First, to Enjoy Your Experiments EJIRI Akira 732
Column 7 YAMADA Takuma 740
6. Conclusion INAGAKI Shigeru 741
Column 8 MATSUOKA Keisuke 742

Review Papers

Profile Measurement of Current Density, Electron Density and Electron Temperature Using Laser Polarimetry

on Burning Plasma IMAZAWA Ryota, KAWANO Yasunori and ITAMI Kiyoshi 743

Announcement

Cover

Trajectories of ions and equipotential lines in a cylindrical discharge type fusion device (a) when the anodes (both ends) are grounded and a negative voltage is applied to the cathode (center), and (b) when the cathode is grounded and a positive voltage is applied to the anodes. The length of ion trajectories in the case of (a) is longer than that in (b). (NOBORIO Kazuyuki, Plasma and Fusion Research Vol.9, 1306142 (2014) <http://www.jspf.or.jp/PFR/>)
