

JOURNAL OF PLASMA AND FUSION RESEARCH

The Journal of the Japan Society of Plasma Science and Nuclear Fusion Research

Vol. 91, No.8, August 2015

Commentary

- Current Trend of Medical Sterilization and Disinfection Methods Using Plasmas
..... ITARASHIKI Tomomasa, OHSHIRO Seisaku, SAKUDO Akikazu and HAYASHI Nobuya 505

Special Topic Articles

- Investigation of Fine Particle Plasma under Microgravity -Experiments on International Space Station (ISS)-
1. Why the Microgravity Environment Is Important in Fine-Particle Plasma Science? TOTSUJI Hiroo 514
2. Basic Properties of Fine Particle (Dusty) Plasmas TOTSUJI Hiroo 515
3. Characteristics of PK-3 Plus and PK-4 Apparatuses for Complex Plasma Experiments on the ISS
..... TAKAHASHI Kazuo, THOMAS Hubertus M., MOLOTKOV Vladimir I.,
ADACHI Satoshi and TOTSUJI Hiroo 517
4. Microgravity Experiments on International Space Station (ISS): from PKE-Nefedov to
PK-3 Plus and PK-4 TOTSUJI Hiroo, TAKAHASHI Kazuo and ADACHI Satoshi 521
5. Chronological Details of International Collaboration Using PK-3 Plus on Board the ISS ADACHI Satoshi 525
6. Experiments Searching the Critical Point of Fine-Particle Plasmas in PK-3 Plus
and Expected Behavior of Fine Particles in PK-4 TOTSUJI Hiroo 529
7. Concluding Remarks TOTSUJI Hiroo 535

Special Topic Articles

- Status of High-Repetition Rate Laser Fusion Experiment
1. Introduction KITAGAWA Yoneyoshi 537
2. High-Repetition Laser Fusion Driver HAMA
..... MORI Yoshitaka, SEKINE Takashi and KAWASHIMA Toshiyuki 540
3. Technology for Repetitive Target Injection and Target Fabrication
..... NISHIMURA Yasuhiko, KOMEDA Osamu, SATOH Nakahiro and TAKAGI Masaru 544
4. Measurement in Highly Repetitive Laser Fusion Experiment HANAYAMA Ryohei and ISHII Katsuhiko 548
5. Applications to Laser-Produced Neutron Sources KAKENO Mitsutaka 553
6. Summary KITAGAWA Yoneyoshi 558

- Information 561
Plasma & Fusion Calendar 567
Announcement 569

Cover

Schematic views of tandem mirror device GAMMA 10/PDX and the divertor simulation experimental module (D-module). (a) GAMMA 10/PDX and the profile of magnetic field strength. (b) A side view of magnetic field line configuration and the D-module at the west end region (open magnetic field region). (c) Details of the D-module. The V-shaped tungsten target plate, exhaust door for pumping, and so on, are installed in the D-module. (Kensuke OKI *et al.*, Plasma and Fusion Research Vol. 10, 1402071 (2015) <http://www.jspf.or.jp/PFR/>)
