

# JOURNAL OF PLASMA AND FUSION RESEARCH

*The Journal of the Japan Society of Plasma Science and Nuclear Fusion Research*

*Vol. 94, No.3, March 2018*

## Special Topic Articles

Ubiquitous Optical Vortex - Principle, Generation and Application -	
1. Introduction .....	KUBO Shin 119
2. Fundamentals of Optical Vortex and the Status Quo in Application Study .....	YOSHIMURA Shinji and ARAMAKI Mitsutoshi 121
3. Generation of Optical Vortex .....	KATOH Masahiro 127
4. Theoretical Issue of Cyclotron Radiation and Optical Vortex .....	PETROSKY Tomio 131
5. Present, Advanced, and Potential Applications of Optical Vortex .....	KATOH Masahiro and KUBO Shin 136
6. Summary and Prospects .....	KUBO Shin 139

## Lecture Note

You're One of Pythonistas from Today	
3. Scientific Computing in Python	
3.1 NumPy/SciPy for Data Analysis .....	KENMOCHI Naoki 141
3.2 How to Use matplotlib .....	YOSHINUMA Mikirou 150
3.3 Multi-Dimensional Data Mining and Machine-Learning with Python .....	FUJII Keisuke 162

PFR Abstracts .....	171
Information .....	172
Plasma & Fusion Calendar .....	177
Announcement .....	179

## Cover

Color contour plot of plasma pressure and contour line of magnetic field integral values  $\psi(r, 0, z)$  on  $r$ - $z$  plane ( $\theta = 0$ ) at normalized time  $t/\tau_A = 0$  (initial state), 285 (after collision), and 640 (after merging), respectively in MHD simulation results of the collision / merging process of the two ST plasmas. Pressure value was normalized by toroidal magnetic pressure. (Shintaro KOIKE *et al.*, Plasma and Fusion Research, Vol.13, 1203008 (2018) <http://www.jspf.or.jp/>)
