

JOURNAL OF PLASMA AND FUSION RESEARCH

The Journal of the Japan Society of Plasma Science and Nuclear Fusion Research

Vol. 95, No. 6, June 2019

Special Topic Articles

Mass Spectrometry and Plasma Physics

1. Introduction	AOKI Jun	257
2. Principles of Ionization by Laser Irradiation	OSAKA Issey	258
3. Principle of Atmospheric Pressure Chemical Ionization	SEKIMOTO Kanako	262
4. Cyclotron Resonance Frequency Shift of Multi-Species Ion Plasmas Due to Space Charge Effect	SOGA Yukihiro and AOKI Jun	267
5. N-body Simulation for Cyclotron Resonance Frequency Shift	FUJIWARA Makoto	272
6. Mass Spectrometry in the Solar System Exploration	YOKOTA Shoichiro and TERADA Kentaro	277
7. Summary	AOKI Jun	282

Lecture Note

Explore the Frontier of High Energy Density Plasma Science with Picosecond Relativistic Laser

1. Introduction	SENTOKU Yasuhiko	284
2. Theory of the Hole Boring by Light Pressure in the Picosecond Relativistic Regime	IWATA Natsumi	286

Cover

Two-dimensional power spectra of normalized brightness of scanning electron microscope (SEM) images of helium plasma irradiated tungsten samples with different ion fluences. Depending on the size of the dominant structure (e.g., pinhole and fuzz), the frequency of the spectral shoulder is different. The concentric pattern implies the non-directionality of the dominant structure. Spectral peaks due to the periodic stripe structure can also be seen (Fig. (a)). (Hirohiko TANAKA *et al.*, Plasma and Fusion Research, Vol. 14, 3402049 (2019) <http://www.jspf.or.jp/>)
