Owing to a typographical error the factors $2\sqrt{2}$ in the numerators of Eqs. (8) and (9) are incorrect. They should be replaced by 4 to give the corrected equations below:

$$\bar{\theta}(W) = \frac{4\omega_b}{\pi} w^{1/2} E(w^{-1}), \quad (8)$$

$$\bar{\theta}(W) = \frac{4\omega_b}{\pi} [E(w) - (1-w)K(w)]. \quad (9)$$
