During amending the manuscript, Figure 1 was omitted and erroneously replaced with Fig. 2, which then appeared twice. It should be replaced by the following corrected Fig. 1.

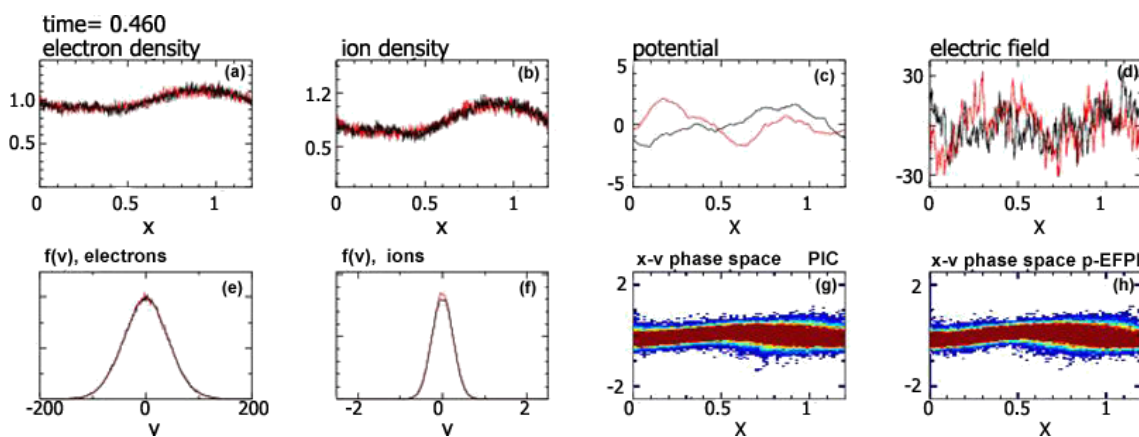

Fig. 1 Snapshots of (a) electron and (b) ion density, (c) potential, (d) electric field and (e) electron, (f) ion PDF, for PIC (red) and p-EFPI (black) at,  $t = 0.46$ ; and ion phase space (g) PIC vs. (h) p-EFPI.
