

JOURNAL OF PLASMA AND FUSION RESEARCH

The Journal of the Japan Society of Plasma Science and Nuclear Fusion Research
Vol. 94, No.2, February 2018

Commentary

Physical Processes of Sunspot Formation and Flare Eruption Originated from Dynamo Action	51
..... NISHIZUKA Naoto, HOTTA Hideyuki and TORIUMI Shin	

Special Topic Article

Current Status and Prospects of Electric Rocket Propulsion Technology	
1. Introduction	TAHARA Hirokazu
2. Current and Future Missions Using Electric Rocket Propulsion	
..... NISHIYAMA Kazutaka and KINEFUCHI Kiyoshi	60
3. Current Status and Issues of Electric Rocket Propulsion for Future Missions	
3.1 Electrothermal Thrusters	TAHARA Hirokazu
3.2 Electrostatic Thrusters	YAMAMOTO Naoji and WATANABE Hiroki
3.3 Electromagnetic Thrusters	ANDO Akira and TAKAHASHI Kazunori
4. Applications of Electric Rocket Propulsion Technology to Other Fields	MOMOZAWA Ai
	81

Lecture Note

You're One of Pythonistas from Today	
1. Preface	YOSHINUMA Mikirou
2. Python Start-Up Guide	FUJII Keisuke
Information	102
Plasma & Fusion Calendar	112
Announcement	114

Cover

(a) Helium plasma irradiation was conducted in divertor simulator NAGDIS-II as pulsating the incident ion energy from 7-8 eV to higher than 50 eV. (b) Although in general the growth of the fuzzy tungsten nanostructures requires the incident ion energy of 20-30 eV, the helium plasma with the incident ion energy of 7-8 eV under the pulsation enhanced the growth of the fuzzy nanostructures. (c) On the other hand, no nanostructure growth occurred at 1300 K, probably because of annealing effect. (Shin KAJITA *et al.*, Plasma and Fusion Research, Vol.13, 1205001 (2018) <http://www.jspf.or.jp/>)
