

# JOURNAL OF PLASMA AND FUSION RESEARCH

*The Journal of the Japan Society of Plasma Science and Nuclear Fusion Research*

*Vol. 97, No. 8, August 2021*

## Commentary

Ultrafast Heating of Ions by Standing Whistler Waves and its Application to Fusion Science ····· SANO Takayoshi	427
---	-----

## Special Topic Articles

Three-Dimensional Effects in the Edge Plasma Region of Fusion Devices	
1. Introduction ····· KOBAYASHI Masahiro	433
2. Three-Dimensional Effects of Magnetic Structure in Helical Device on Edge Plasma Transport ····· KOBAYASHI Masahiro	436
3. Three-Dimensional Effects on Peripheral Plasma Arising from Non-Axisymmetric Impurity Gas Puff and Plasma-Facing Wall ····· KAWAMURA Gakushi and KOBAYASHI Masahiro	447
4. Three-Dimensional Effects of External Resonant Magnetic Perturbation on Edge Transport in Tokamaks ····· SUZUKI Yasuhiro and TANAKA Hirohiko	455
5. Three-Dimensional Effects of Detached Plasma Formation on Non-Diffusive Transport ····· TANAKA Hirohiko	463
6. Summary ····· OHNO Noriyasu	471

PFR Abstracts ·····	474
---------------------	-----

Information ·····	475
-------------------	-----

Announcement ·····	477
--------------------	-----

## Cover

Contour plot of the likelihood of high-beta disruption in JT-60U, which has been quantified in the disruption prediction study with machine learning. The likelihood corresponds to the distance from the boundary between disruptive and non-disruptive regions, determined by machine-learning classifier. The parameters used to calculate the likelihood has been selected by sparse modeling.
